Speech-language pathologists (SLPs) are seeing more and more different types of disabilities in the mainstream classroom and in private practice. We, as communication professionals, are being asked to help devise the best course of action for these children. The focus of this course is on those children with an auditory disability. Professionals learn up-to-date knowledge of current hearing aids and cochlear implants, as well as other developments. The workshop teaches tips for those working with children with hearing loss in a general education setting. Basic audiology will be reviewed.

Learning Objectives:

Attendees will:

1. Will learn tips to working with children with hearing loss within a general education setting.
2. Will update knowledge of current hearing aids and cochlear implants.
3. Will review audiology basics of audiograms and hearing loss.
